 Jul 2012-Aug 2013, Associate Professor at Department of Medicine and Clinical Science, KU
 Sep 2013-, Professor, at Division of Gastroenterology, Department of Medicine, IMU

Professional Experience

I have been investigating clinical significance of colonoscopy and enteroscopy for the diagnosis and the treatment of intestinal disorders.
 I was trained in animal experiments for investigating pathophysiology of nonsteroidal anti-inflammatory drug-induced enteropathy, ulcerative colitis, and Crohn's disease.
 I have been evaluating genetic aspects of chronic inflammatory bowel disease in Japanese population by means of single nucleotide polymorphism analysis.
 I have been a co-investigator of multicenter clinical trials. I have been involved in drug trials in inflammatory bowel diseases.
